

# How to find Joint Research Center for Computational Biomedicine (COMBINE)

- 3A and 3B are circular bus routes, 3A going anti-clockwise and 3B clockwise direction.
- Arriving with 3B or 103 from direction of Hauptbahnhof or with buses 4, 5, 32, 45 you should get off at Uniklinik stop.
- If you come with 3A, 30, 33, 70, 73, 80, 103, 173 from direction of Ponttor/Westbf, you should get off at the Wendlingweg stop.
- Starting from Uniklinik bus stop, come under the big green arch, go straight on Pauwelsstrasse across the bridge until you see Helmholtz Institute on your left. After the Helmholtz building turn left onto Worringerweg, and proceed straight under the red Biologie-Chemie building. Turn right on the red paved path, until you find yourself on the terrace at the Chemie building Caffee entrance. Just opposite this coffee, there is a small path across the bushes. Here come across the car park, and approach the north-west corner of the blue windowed grey building (MTI2). There you find a door opening from the outside.
- From Wendlingweg bus stop, come across the grassed area, perpendicularly to the road. You see the blue windowed grey building (MTI2) in front of you. Go on the right side of the building, under the bridge connecting with the other building. At the opposite corner you find the door opening from the outside.
